 Assistant Director for Tests

LETTER OF UNDERSTANDING

On an informal visit to DNA on November 15 (on an unrelated matter) I saw CAPT Worthing and Captain Drake, USA, DNA JAG, to discuss the status of the letter of understanding you gave to General Dunn on November 13. This letter was still being staffed by these two officers, but the indication was that a complete rewrite would be given back to us as a counter-proposal. The current version of that rewrite was read to me and it sounded quite acceptable from our standpoint. Apparently the major objections to our letter were: (1) the JAG questions the inference that General Dunn is agreeing to something for the DOD and (2) CAPT Worthing does not accept the agreements of the September 7 meeting as directive in nature. In any case, DNA will provide us with their proposal by close of business November 17.
